## **BEST AVAILABLE IMAGES**

Defective images within this document are accurate representations of the original documents submitted by the applicant.

Defects in the images may include (but are not limited to):

- BLACK BORDERS
- TEXT CUT OFF AT TOP, BOTTOM OR SIDES
- FADED TEXT
- ILLEGIBLE TEXT
- SKEWED/SLANTED IMAGES
- COLORED PHOTOS
- BLACK OR VERY BLACK AND WHITE DARK PHOTOS
- GRAY SCALE DOCUMENTS

**IMAGES ARE BEST AVAILABLE COPY.**

As rescanning documents *will not* correct images,  
please do not report the images to the  
**Image Problem Mailbox.**

102  
 Claims:

1. (Amended) A cosmetic, characterized in that it contains an organopolysiloxane expressed by the following general formula (1)

and at least one other kind of organopolysiloxane than that expressed by the formula (1), said other kind of organopolysiloxane being not crosslinked organopolysiloxanes which are prepared by addition polymerization in the presence of the organopolysiloxane expressed by the general formula (1) to be swollen with the organopolysiloxane expressed by the general formula (1).

2. (Deleted).

3. (Amended) The cosmetic as described in Claim 1, wherein said other kind of organopolysiloxane is liquid at 25°C and 1 atm.

4. The cosmetic as described in Claim 3, wherein said liquid organopolysiloxane is volatile at 25°C and 1 atm.

5. The cosmetic as described in Claim 4, wherein said volatile organopolysiloxane is a cyclic dimethylpolysiloxane having 4 to 6 silicon atoms.

6. The cosmetic as described in Claim 3, wherein said liquid organopolysiloxane is non-volatile at 25°C and 1 atm.

7. The cosmetic as described in Claim 6, wherein said non-volatile organopolysiloxane is at least one selected from the group consisting of dimethylpolysiloxanes and methylphenylpolysiloxanes.

8. (Amended) The cosmetic as described in Claim 1, wherein said other kind of organopolysiloxane is of a form of paste, gum, elastomeric solid or non-elastomeric solid at 25°C and 1 atm.

9. The cosmetic as described in Claim 8, wherein said gum form of organopolysiloxane is dimethylpolysiloxane gum with a degree of polymerization ranging from 3,000 to 20,000.

10. The cosmetic as described in Claim 8, wherein said elastomeric solid form or non-elastomeric solid form of organopolysiloxane is dispersed in the cosmetic.

11. The cosmetic as described in Claim 10, wherein said non-elastomeric solid form of organopolysiloxane is polyalkylsilsesquioxane spherical powder.

12. The cosmetic as described in Claim 8, wherein said non-elastomeric solid form of organopolysiloxane is at least one selected from the group consisting of acryl silicone copolymers, fluorinated organopolysiloxanes, trimethylsiloxysilicates (i.e., MQ resins), and trimethylsiloxysilicates containing a dimethylsiloxy group (i.e., MDQ resins).

13. (Amended) The cosmetic as described in Claim 1, wherein said other kind of organopolysiloxane is a modified organopolysiloxane.

14. The cosmetic as described in Claim 13, wherein said modified organopolysiloxane is at least one selected from the group consisting of fluorinated organopolysiloxanes, polyether-modified organopolysiloxanes, amino-modified organopolysiloxanes, organopolysiloxanes containing an alcoholic hydroxyl group, glyceryl-modified organopolysiloxanes, and polyglyceryl-modified organopolysiloxanes.

15. (Amended) The cosmetic as described in Claim 1, wherein said other kind of organopolysiloxanes is a crosslinked organopolysiloxane.

16. The cosmetic as described in Claim 15, wherein said crosslinked organopolysiloxane is a reaction product of organopolysiloxane having at least two alkenyl groups per molecule with organohydrogenpolysiloxane having a Si-H bond.

17. The cosmetic as described in Claim 15, wherein said crosslinked organopolysiloxane has at least one moiety selected from the group consisting of polyoxyalkylene

moieties, alkyl moieties, alkenyl moieties, and aryl moieties.

18. The cosmetic as described in any one of Claims 15 through 17, wherein said crosslinked organopolysiloxane is contained in the cosmetic in a state swollen in an organopolysiloxane of a dynamic viscosity of 0.65 to 100mm<sup>2</sup>/s.

19. (Amended) The cosmetic as described in any one of Claims 1, 3 to 17, and 18, wherein it further contains a fluorine-containing compound.

20. (Amended) The cosmetic as described in any one of Claims 1, 3 to 18, and 19, wherein it further contains a UV-ray protective component.

21. (Amended) The cosmetic as described in Claim 20 or 24, wherein said UV-ray protective component is at least one selected from the group consisting of titanium dioxide fine particle, zinc oxide fine particle, 2-ethylhexyl paramethoxycinnamate, 4-tert-butyl-4'-methoxydibenzoylmethane, and benzophenone UV-ray absorbents.

22. (Amended) The cosmetic as described in any one of Claims 1, 3 to 20 and 21, wherein it further contains a compound having an alcoholic hydroxyl group.

23. (Amended) The cosmetic as described in any one of Claims 1, 3 to 21, and 22, wherein it further contains a thickening agent.

24. (Added) A cosmetic, characterized in that it contains an organopolysiloxane expressed by the following general formula (1)

and at least one selected from the group consisting of fluorine-containing compounds, UV-ray protective components, compounds having an alcoholic hydroxyl group and thickening agents.
